

CueAnon: What QAnon Signals about Congressional Candidates and What it Costs Them

Benjamin S. Noble and Taylor N. Carlson

Codebooks

For data used in observational matching and text analysis

name: candidate's name

female: 1 if female, 0 otherwise

prev_off: was the candidate a previous officeholder at state or federal level

other: 1 if party is not republican, democrat, or independent, 0 otherwise

republican: 1 if party is republican, 0 otherwise

independent: 1 if party is independent, 0 otherwise

democratic: 1 if party is democratic, 0 otherwise

senate: 1 if running for a senate seat, 0 if running for a house seat

ge_cand: 1 if the candidate made it to the general election, 0 otherwise

incumbent: 1 if candidate is a federal incumbent, 0 otherwise

open: 1 if the seat is open, 0 otherwise

pop_density: population density (per square mile) of the constituency

pviR: cook partisan voting index for the constituency, rescaled where more positive values are more republican leaning and more negative values are more democratic leaning

med_age: median age in the constituency

pct_white: proportion of constituency identifying as white

pct_black: proportion of constituency identifying as black

pct_some_college: proportion of constituency over 25 with at least some college education

med_hhi: median household income (\$1000s) in the constituency

qcand: 1 if candidate supported/endorsed qanon, 0 otherwise

total_n: total number of articles written about the candidate between 01/01/2020 and 11/02/2020.

n_neg: total number of negative articles written about the candidate

For data used in vignette experiments

tass_small.csv

Caseld: unique subject identifier

weight: subject specific weight

exp_cond: 1 if respondent was in the negative treatment condition, 2 if respondent was in the neutral treatment condition, 3 if respondent was in the qanon treatment condition.

neutral: 1 if subject was in the neutral treatment condition, 0 otherwise

negative: 1 if subject was in the negative treatment condition, 0 otherwise

qanon: 1 if subject was in the qanon treatment condition, 0 otherwise

trust: respondent's trust in the mainstream media, 1 if had none at all, 2 if had not very much, 3 if had a fair amount, 4 if had a great deal.

dem: 1 if respondent identified as a strong, not very strong, or lean democrat; 0 otherwise

ind: 1 if respondent identified as a true independent (not lean); 0 otherwise

white: 1 if respondent identified as non-hispanic white; 0 otherwise

black: 1 if respondent identified as non-hispanic black; 0 otherwise

latin: 1 if respondent identified as hispanic; 0 otherwise

asian: 1 if respondent identified as non-hispanic asian; 0 otherwise

therm: candidate feeling thermometer rating, 0-100

perc_rep: whether candidate was perceived as a republican, 1 if so and 0 otherwise

female: 1 if respondent identifies as female, 0 if male

age4: 1 if respondent is 18-29, 2 if respondent is 30-44, 3 if respondent is 45-59, 4 if respondent is 60+

educ5: 1 if respondent has less than a high school degree, 2 if respondent has a high school degree or equivalent, 3 if respondent has vocational/tech school/some college/associates, 4 if respondent has a bachelor's degree, 5 if respondent has post grad study/professional degree

income: respondent's household income on an 18-point scale (see below)

income4: 1 if respondent is in income category 1-6, 2 if respondent is in income category 6-9, 3 if respondent is in income category 10 to 13, 4 if respondent's income is category 14+ (see below)

newsimport: respondent's perceived importance of keeping up with the news, 1 if not at all important, 2 if not very important, 3 if somewhat important, 4 if very important, 5 if extremely important

ideology: respondent five-point ideology where 1 is very liberal and 5 is very conservative.

perc_ideo: perceived ideology of the candidate on a 7-point scale where 1 is extremely liberal and 7 is extremely conservative

pid7: 7-point party identification where 1 is strong democrat and 7 is strong republican

wave: 1 if respondent was in wave 1, 2 if respondent was in wave 2

cand_name: respondent's free text recall of the candidate's name

support_q: 1 if the respondent has a positive impression of qanon, 0 otherwise

dislike_q: 1 if the respondent has a negative impression of qanon, 0 otherwise

dk_q: 1 if respondent doesn't know enough to say whether they have a positive or negative impression of qanon, 0 otherwise

metro_area: 1 if respondent lives in a metropolitan area, 0 otherwise

trust_fox: whether respondent trusts fox news; 1 if respondent has none at all, 2 if respondent has not very much, 3 if respondent has fair amount, 4 if respondent has a great deal

evangelical: 1 if respondent describes themselves as "born again" or evangelical christian, 0 otherwise

relig_attend: respondent's 9-point religious attendance (see below).

household income categories:

- 1 Less than \$5,000
- 2 \$5,000 to \$9,999
- 3 \$10,000 to \$14,999
- 4 \$15,000 to \$19,999
- 5 \$20,000 to \$24,999
- 6 \$25,000 to \$29,999
- 7 \$30,000 to \$34,999
- 8 \$35,000 to \$39,999
- 9 \$40,000 to \$49,999
- 10 \$50,000 to \$59,999
- 11 \$60,000 to \$74,999
- 12 \$75,000 to \$84,999
- 13 \$85,000 to \$99,999
- 14 \$100,000 to \$124,999
- 15 \$125,000 to \$149,999
- 16 \$150,000 to \$174,999
- 17 \$175,000 to \$199,999
- 18 \$200,000 or more

Religious attendance categories:

- 1 Never
- 2 Less than once per year
- 3 About once or twice a year
- 4 Several times a year
- 5 About once a month
- 6 2-3 times a month
- 7 Nearly every week
- 8 Every week
- 9 Several times a week

mturk_small.csv

id: unique subject id

trust: respondent's trust in the mainstream media, 1 if had none at all, 2 if had not very much, 3 if had a fair amount, 4 if had a great deal.

fav: candidate feeling thermometer rating, 0-100

pid7: respondent's party id on a seven-point scale, string representation

win_treat: treatment condition (as above, neutral/negative/qanon) if respondent was assigned to the condition in which the candidate won their election without quotes.

win_quote: treatment condition (as above, neutral/negative/qanon) if respondent was assigned to the condition in which the candidate won their election and the constituent quotes were included.

win_neutral: 1 if respondent was assigned to the neutral condition in the win experiment, 0 otherwise

win_negative: 1 if respondent was assigned to the negative condition in the win experiment, 0 otherwise

win_qanon: 1 if respondent was assigned to the qanon condition in the win experiment, 0 otherwise

win_quote_neutral: 1 if respondent was assigned to the neutral condition in the win and quote experiment, 0 otherwise

win_quote_negative: 1 if respondent was assigned to the negative condition in the win and quote experiment, 0 otherwise

win_quote_qanon: 1 if respondent was assigned to the qanon condition in the win and quote experiment, 0 otherwise

For data used in conjoint experiments

conjoint_demo

resp_gop: 1 if respondent identifies as a republican (includes leaners), 0 otherwise

resp_dem: 1 if respondent identifies as a democrat (includes leaners), 0 otherwise

resp_ind: 1 if respondent identifies as independent, 0 otherwise

age: respondents age

employed: 1 if respondent is employed, 0 otherwise

female: 1 if respondent identifies as female, 0 otherwise

conjoint_df

id: unique subject id

choice_num: respondent's choice in experiment

profile_num: candidate profile number

party: candidate's party

prior: candidate's prior officeholding

qanon: whether candidate has supported qanon

gender: candidate's gender

impeach: whether candidate supported trump's first impeachment

infra: candidate's position on infrastructure bill

econ: whether candidate supports low taxes versus more social spending

imm: whether candidate supports building a border wall

pref: which candidate respondent prefers in pair

Y: binary variable, 1 if candidate is chosen by respondent, 0 otherwise

other_party: party of the candidate's opponent

primary: whether pair are both the same party

likert_favor: rating of candidate's 7-point favorability

likert_ideology: rating of candidate's ideology (1 is extremely liberal, 7 is extremely conservative)

choice_uid: id of the respondent's choice

resp_pid7: respondent's 7-point ideology where 1 is strong democrat and 7 is strong republican

resp_gop: 1 if respondent is a republican (including leaners), 0 otherwise

resp_dem: 1 if respondent is a democrat (including leaners), 0 otherwise

resp_ind: 1 if respondent is an independent, 0 otherwise

ideo: respondent's 7-point ideology, 1 is extremely liberal and 7 is extremely conservative

trust: respondent's trust in the mainstream media, 1 if had none at all, 2 if had not very much, 3 if had a fair amount, 4 if had a great deal

antiestablishment1-12: responses to the anti-establishment scale questions

believe_q: response to whether a respondent is a believer in qanon, 1 if strongly disagree, ..., 5 if strongly agree.

alt_right_news: 1 if respondent says they have used gab, parler, of 4chan several times or every day, 0 otherwise

fox_user: 1 if respondent says they use fox news several times or every day, 0 otherwise

fox4: 1 if respondent uses fox news never, 2 if uses fox news once, 3 if uses fox news several times, 4 if uses fox news every day

antiestablish_scale: a scaled measure of all 12 antiestablishment scale questions
